

include/Zeta/Core/Context  
Operation.hpp

```
graph TD; A[include/Zeta/Core/Context Operation.hpp] --> B[condition_variable]; A --> C[mutex];
```

The diagram illustrates a C++ header file's dependencies. A central box at the top represents the header file 'include/Zeta/Core/Context Operation.hpp'. Two blue arrows originate from the bottom of this box, pointing downwards to two separate boxes below it. The left box is labeled 'condition\_variable' and the right box is labeled 'mutex', indicating that the header file includes these two components.

condition\_variable

mutex
